Opportunities (Landing Page)

The Center for Data Science provides a wide range of opportunities for students, postdoctoral researchers, and career-seekers alike. Our aim is to provide the opportunity for impactful data science research and exceptional experiences, while simultaneously fostering collaborations with industry partners and non-profit organizations.

Working in tandem with the College of Information and Computer Sciences (CICS), our faculty, students, and postdocs assist companies in identifying their goals and facilitate mutually rewarding involvement. These reciprocal partnerships provide valuable opportunities for students and postdocs to gain practical experience, and for our industry partners to leverage the advanced expertise of our team.

This page will be regularly updated with new opportunities as they become available. In the event that there are currently no opportunities posted, we encourage you to check back periodically for updates. Thank you for your interest in our offerings.

Another version that contains more detail/summary about the actual opportunities (this one seems better/clearer?)

The Center for Data Science offers a wide range of opportunities for students, postdoctoral researchers, and career-seekers alike. Our aim is to provide the opportunity for impactful data science research and exceptional experiences, while simultaneously fostering collaborations with industry partners and non-profit organizations.

For graduate students, we offer programs that provide hands-on experience in real-world projects, allowing them to develop skills and expertise in data science while contributing to the betterment of society. Through our collaboration with the College of Information and Computer Sciences (CICS), postdoctoral researchers have the opportunity to receive funding to conduct cutting-edge research in external labs.

For those seeking careers in data science, the latest openings will be regularly updated on our Careers page as they become available, allowing you to stay up-to-date on the latest job opportunities at The Center for Data Science. In the event that there are currently no opportunities posted, we encourage you to check back periodically for updates.

At the Center for Data Science, we are committed to providing exceptional research and impactful opportunities to help our faculty, students, postdocs, and partners thrive in the exciting and ever-evolving field of data science.

Some supplementary writing that more explicitly discusses the opportunities, although it may be unnecessary for a landing page:

Our Data Science for the Common Good and Industry Mentorship programs provide students with invaluable hands-on experience in real-world projects, allowing them to develop skills and expertise

in data science while contributing to the betterment of society. Industry partners are encouraged to join our Industry Affiliates Program and propose projects for collaboration with our talented Master's students.

Faculty members of the College of Information and Computer Sciences can take advantage of our Postdoctoral Fellowship Program, which offers funding to support their postdoctoral researchers.

For those seeking advanced project assistance, our Data Core program provides first-rate data science and software engineering services for research and development projects.

For career-seekers, we aim to provide a comprehensive and dynamic platform that benefits students, university members, as well as outside government, non-profit, and for-profit enterprises whenever possible. The latest openings will be regularly updated on our Careers page as they become available. In the event that there are currently no opportunities posted, we encourage you to check back periodically for updates.

Commented [4]: or "on this page"?

Postdoctoral Funding

Through the CDS Postdoctoral Fellowship Program, The Center for Data Science provides funding in support of postdoctoral researchers. The Center has currently provided funding to postdocs in a range of research labs at UMass.

Applications for the Postdoctoral Fellowship Program are submitted by the College of Information and Computer Sciences faculty, and fellowships are awarded through a competitive process. We encourage CICS faculty members to apply if you are seeking funding for postdoctoral research. If you are a postdoctoral researcher seeking funding, we encourage you to reach out to CICS faculty to pursue this opportunity.

The latest information about future funding opportunities will be regularly updated here.In the event that there are currently no opportunities posted, we encourage you to check back periodically for updates.

Please note that although the Center for Data Science provides funding for this research, the research does not take place at the Center.

Careers

The Center for Data Science is always looking for talented data scientists and researchers to join our team. As a member of our team, you will collaborate with faculty, postdocs, students, and industry partners to develop partnerships that drive industry innovation and benefit society.

The latest openings will be regularly updated on this page as they become available, allowing you to stay up-to-date on the latest job openings. In the event that there are currently no opportunities posted, we encourage you to check back periodically for updates.

Partnerships (fluff/intro text)

The Center for Data Science facilitates collaborative and mutually beneficial partnerships with data science researchers, industry partners, and non-profit organizations. Our current partnerships consist of researchers from numerous areas of computer science and informatics, industries ranging from [? to ?], and nonprofit organizations that seek data science in support of the common good. We aim to expand our partnerships to foster innovation and progress with data science, and welcome new opportunities to collaborate with organizations committed to making a positive impact on society.

By working together, we can leverage our collective expertise to tackle challenges faced by our communities and industries. Whether you're a researcher, industry professional, or representative of a nonprofit organization, we invite you to explore the benefits of partnering with the Center for Data Science and join us in bettering the future through data science.

Commented [12]: could specify here or be more vague

Commented [13]: I think we are going to share logos / links to labs on this landing page so can be vague

Commented [14]: could end here if it needs to be shortened
